

Stylish Retractable and Pleated Screens

Artilux systems are ideal for:

BI-FOLD DOORS • FRENCH DOORS • STACKER DOORS
SLIDING AND HINGED DOORS • WINDOWS • VERANDAS
LARGE OPENINGS • DIFFICULT TO SCREEN OPENINGS

The Artilux Difference

When you choose to buy a retractable screen, you are not just buying a fly screen, you are making it part of your home. At Artilux we really understand the difference, and that is why we offer a choice of solutions to suit your specific applications and lifestyle.

Artilux insect screens are designed to blend seamlessly with living and working areas. We take pride in paying special attention to all the small details that make them look better, operate smoothly and work relentlessly. That is what makes our retractable systems the best choice: a perfect balance of how they look in your home, and superior functionality.

Alfresco Pleated Insect Screens

Easy to operate and visually attractive, the Artilux Alfresco pleated screen will truly enhance the look and feel of your home.

- Extend when you need it, retract when you don't.
- Cord tensioned and free sliding, the screen can be stopped at any point along the opening.
- Functional and decorative protection against insects.
- Able to span up to 8 metres wide (with a double unit).
- Reinforced Polyester pleated mesh and exclusive top track design keeps mesh in place over large openings.
- With a discrete 20 mm track, it is the ideal choice for screening all types of openings, especially those with narrow frames.
- Easy to operate, maintain and child friendly.

Bring the views and fresh air into your home, without the insects!

Retractable Insect Screens

Roll away screens in a choice of systems and cassette sizes designed to suit your home and lifestyle.

- When not in use the screen rolls discreetly into a cassette that blends seamlessly with windows and/or doors frames.
- Soft closing mechanism ensures your screen stays firmly in place when in use, and retracts quietly and gently when released.
- Choice of 3 cassette sizes designed to suit small, medium and wide openings, from single doors and windows, to verandas and patios.
- Choice of 3 operating systems designed to work in harmony with your home and lifestyle.

Standard retractable: simple operation, left opened or closed.

Multi-lock retractable: unique pin locking system enabling the screen to be left partially open. Ideal for bi-fold and French doors with plenty of traffic.

Chain Glide retractable: low profile bottom guide creates a barrier free entry.

- Ability to screen up to 6 metre openings (with a double unit).
- Exclusive features that prevent the mesh from dropping or blowing out in large openings.
- Available through resellers Australia wide for professional installation service or in DIY form - ideal for experienced renovators to retrofit.

High quality, built to last.

Our products are engineered to last. Frames are fabricated from top quality extruded aluminium. Retractable Screens mesh is made of high quality PVC coated fibreglass, and Retractable Alfresco Pleated Screen is made of high quality polyester. Artilux is Australian owned and operated and we have been proudly designing and manufacturing our screens since 1985.
